

Received by Chief Surveyor 7. 10. 99

Received from Chief Surveyor \_\_\_\_\_

ESSEL'S NAME Iron S.S. Well Fishing Vessel Metallia Report Gen. No. 284

The remarks of the Chief Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report 24/5/92.)

re of Survey \_\_\_\_\_

First entry

It is submitted that before this case receives the consideration of the Committee the Surveyor should be informed that the thickness of E strake of plating and the breadth of the main deck stringer and tie plates as stated on his report do not agree with the sizes shown on the sketch of midship section, and he should therefore be requested to state whether his report agrees in these particulars with the ship as built. The sketch of midship section should be returned to the Surveyor for correction if necessary, and a prompt reply should be requested.
