Geo W Deyfang Esq

Sir

In the supplement just received we observe that the ship "Chinaman" has not A. & C. L. attached to her character, as we understood by your letter to us would be the case. Both anchors & chain, were proved at the machine, but the ~~weight~~ ^{weight} neglected to prove the former 10% above Admiralty test but this we undertook to get corrected when the ship went round to L'pool to load, with which you said the Committee would be satisfied. We hope this therefore will be corrected, if not in next supplement at least when new book is published. The most obedient servant
Robert Smith & Co
