## Particulars of Examination and Repairs (if any)

(State clearly the cause of Repairs if any, and, in detail, the nature and extent of Examinations and subsequent Repairs.) Repairs on account of Damage should be separated from Repairs due to other causes. State also the dates and initials of any letters respecting this case

Did the Surveyor personally go inside each Boiler separately (including the Donkey Boiler, if any), and make a thorough examination at this time?

If this was not done, state for what reasons? \_\_\_\_\_

And what parts of the Boilers could not be thus thoroughly examined? \_\_\_\_\_

Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each boiler? \_\_\_\_\_

*Examined sea connections fitted on vessel's side. Man tube fitted  
 place screw shaft shipped in tube and the propeller securely fastened on screw  
 shaft.*

## General Observations, Opinion, and Recommendation:—

(State clearly what alteration, if any, is suggested to be made in the existing classification and notification of the vessel's machinery in the Register Book, consequent upon this survey: thus, for example, B.S. 1/89, B. & M.S. 1/89, or \* L.M.C. 1/89, as the case may be.)

*The above mentioned mentioned parts of Machinery are now in good order  
 and safe working condition. And the vessel has been taken Glasgow for fitting  
 Engines and Boilers on board.*
