13. Hamilton Street, Greenock.

6th July 1893.

Dear Mr. Jordan.

The width
of rider plate to centre
keelson, in BR Almora
is $11\frac{3}{4}$ ins and I shall be
glad if you will kindly
fill this in on my Report.

The moulded depth $24.4\frac{1}{4}$ was
the measured depth obtained for
freeboard. I did not notice
that this did not exactly agree
with the other depths; but
I find the depth top of floor to
upper deck beams is given
slightly in excess & might be
made $23.1\frac{1}{2}$. Yours faithfully
C. Burney.
