Surveyed Afloat or in Dry Dock? Name of Dock Port Glasgow Docks Destined Voyage Rouen.

W.B.=DBa tons; f tons; uE&B tons; Cell DB tons; tons; F.P.T. tons; A.P.T. tons; M.T. tons.

Particulars of Classification (which must be inserted precisely as in Register Book & Supplements).

N.B.—All alterations in the existing records should be underlined.

If the vessel has Water Ballast Tanks, state whether the manhole covers have been removed, and the insides of the tanks examined. Also state the amount of deterioration (if any) found in the thicknesses of the floors, framing, girders, and of the inner bottom plating, especially in the boiler space.

Last Survey, No.

11070 Port JK

CHARACTER.	Years Ascertained	Machinery and Boiler Surveys (including date of N.B., if any).
✗ 100A.1.	2.92	✗ LMC 10.88
S.S. Sing No 2. 88	B.S. 5.92	

Periodical Surveys, when held, must be reported in detail and serially in the terms of the Rules. State clearly the use of Repairs, if any, and, in detail, the nature and extent of Examinations and subsequent Repairs. Repairs account of Damage (the cause of which must be stated) should be separated from Repairs due to other causes; besides being detailed in the body of the report, should be summarised in the form shown below. Whenever the placement of Anchors, Chains, or Hawser is reported, the particulars of weight or size and test of the articles should be clearly stated, and also the weight or size, &c., required by the Rules, together with the vessel's Equipment letter, if any. State also the dates and initials of any letters respecting this case.

PAIRS, OR EXAMINATION AS PER RULE, FOR S.S. No 3 (Partly held) Survey due 1893-2 ans.

The vessel placed in Dry Dock, the bottom cleaned and recoated; rudder lifted and rebrushed.

An examination made in Engine and Boiler Space, and repairs effected as noted below in accordance with Secretary's letter of 27/11/94, and the accompanying tracing.

The side bunkers cleared, the close ceiling lifted, and the floors, spans etc to height of close ceiling cleaned and recoated; the close ceiling renewed. All hand steam suction, sluice valves etc put in good order; the hand pumps tested by water and found satisfactory.

With the exception of the above i.e. the examination in Dry Dock, the examination in Boiler Space and the lower part of side bunkers, the overhaul of the pumping arrangements, and the testing of hand pumps, the whole of the S.S. No 3 remains to be done very;

SUMMARY OF DAMAGE REPAIRS:—Plates, Fairied or Repaired; Frames, ditto. Plates, Renewed; Frames, ditto. Other Repairs Rocking repairs under keel.

SENT CONDITION OF THE

Waterways	As far as can be seen
framings	in good condition
Up'r Dk. Beams & Fastenings	seen
New'r Dk. Beams & Fastenings	seen
Plating	good
Blanking	condition
Transom Rivets	not seen
Breasthooks & Stemson	not seen

Transoms, Pointers, & Crutches	not seen
Timbers of Frame at the openings	fair
ditto ditto at other places	fair
Keelsons	fair
Gangs, Sheds & Stringers	fair
Salting (State if examined.)	seen
Ceiling	fair
Cement or Asphalt (State which.)	order
Tanks (State if now tested.)	not tested
Caulking of Bot'm, Dk, & Wat'r'y's	good

Copper, or Y.M. (State if on Felt.)	Year
When put on, Month	
Rudder	Good
Windlass & Capstan	—
Pumps	—
Engine Room Skylights	—
Coal Bunker, Open'gs, Lids, &c.	—
Scuppers	—
Cargo & Main H'tch'w'y's	—

Hatches	Good
Boats	—
Masts, Yards, &c.	Good
Condition, how ascertained	From Deck
Sails	—
Equipment letter	20
Anchors, No. of	313 15 2K
Cables (State if now ranged)	No
" length	size
" Rule length 240	size 112/16
Hawsers & Warps	Good
Standing & Running Rigging	—

General Observations, Opinion as to Class, Recommendation, &c.:—

State clearly whether any and, if so, what alteration is suggested to be made in the existing classification and notification of the vessel in the Register Book consequent upon this survey, thus, for example:—"to remain as now classed in the Register Book without fresh record of Survey," "to remain as classed and to have record of survey, 9,91," or "to remain as classed and to have record of survey, 9,91, and the notations of ss No. 1-91 and ptnD91, &c."

As far as can be seen this vessel is in a good and efficient condition, eligible in our opinion to remain as now classed without fresh record of survey until the completion of the requirements of the S.S. No 3.

REC'D 6 FEB 1895

Port of Greenock

Continuation of Report No. 11189 dated 5th Feb 1895 on the

Iron Sch "Neptune"

way; the holds and peaks cleared, the ceiling removed and an examination made; the side bunkers examined above the close ceiling; the cables ranged, and the masts, spars and equipment examined; the double bottom tanks in holds tested under the required pressure, and examined internally; all the decks examined, and the outside plating above M.L cleaned and painted where required.

Repairs now effected:

In Boiler Room: Nine floor plates removed from the 2nd side girders to the middle line on each side of ship with $\frac{1}{16}$ " steel. The side girders in double bottom renewed over the whole length of the Boiler Room with $\frac{1}{16}$ " steel plates the one nearer the M.L being worked intercostally as in original construction, and the other continuously.

The double bottom tank in C113 space is not intended to be used for water ballast in future, and the top which was much wasted in Boiler Room has been renewed as follows, ^{with steel} very, with one middle line plate, $36'' \times \frac{1}{8}$, one plate on top of 9¹/₂ girder $30'' \times \frac{1}{8}$, and one above 9¹/₂ girder $24'' \times \frac{1}{8}$, all extending about the length of Boiler Room, the stroke of plating near the tank side being left untouched. These plates are connected transversely by tie plates $12'' \times \frac{1}{8}$.

The reverse frames to new floors fitted $3'' \times 3'' \times \frac{1}{16}$ steel, and the intermediate ones without floor plates renewed with $4\frac{1}{2}'' \times 3'' \times \frac{1}{16}$ angles, with large brackets at M.L connecting these new reverse frames and the frames to the centre girder. On Side four short floors fitted between the 2nd girders. The tank side

In Engine Room: On each side of ship 9 intercostal plates of the side girders next to the middle line were doubled at the lower part, and a doubling plate fitted to the two floors forming the "well" at the after end of engine room on Side.

The plates of the lower stroke of side bunker bulkhead renewed. 6 in H.P. a new dawley boiler recess fitted; the stools to main boilers renewed. The Bridge deck plankings lifted for the removal of the Boilers now renewed, and the Boilers casing in way of funnel partly renewed.

In effecting the repairs in Boiler Room one rivet through the solid plate in the line of 1st side intercostal on Side was found started and leaking, was made good by means of a turned bolt (nut and screw) with efficient washers & grommet when vessel was afloat by a diver. It is intended this bolt shall be replaced with a rivet when vessel is next in dry dock.

REC'D. 6 FEB 1895

Port of Greenock Continuation of Report No. 11189 dated 5th Feb. 1895 on the

S.s "Neptune"

We are informed by the Owner (Mr. H. Seibold) that he intends completing the survey at Bilbao not later than April next (see the attached letter). The Owner has been advised of the requirements for completing this survey.

S. A. Marsh.

Thos. Phillips
