

H

S.S. "Itouers."

It is submitted that the proposal to fit a roaming angle $3 \times 3 \times 10/20$ around the 2 bunker hatches on the main deck, of size 4 ft. by 3 ft., (at the request of the owners) in order to avoid interference with the passageway of the horses to their stalls, might be approved provided the arrangements for bolting the hatches be fitted, ^{as shown on the sketch} to the entire satisfaction of the surveyor.
