Enclosed I beg to return corrected
your general "circles". The collection bulkhead
is not extended to the upper deck as the stowage
is arranged, or passengers and crew little
place is required; only a certain length of
the vessel being available for the foreign
passenger trade. Reidew told me that the
will plans were have been fixed at around
by circulation for as no reduction has been
made the Reidew were of opinion that
this was not necessary. Enclosed the list
made by the Fuel Company of Scotland & Co
of the cargo on ship is. that I have made
several binding lists with the plans and
found them of excellent material.

As the ship is nearly finished the
certificates are mostly wanted, please
send them as quickly as possible.

Mr. Libbert's health is improving
and I will speak to him on the subject
of your letter of the 2nd inst in a day or two.

I am
your obedient servant.
