

Proposed conversion of the S.S. "STOCKHOLM" into a Whale Oil Tanker.

-----

This Svenska Amerika Liner has been replaced by the Motor Vessel "KUNGSHOLM", and is now proposed to be altered into a Whale Oil Tanker.

The proposal was discussed generally with Mr. Gearing when he was in Gothenburg recently, and it was understood that it was proposed to alter the vessel in a novel way, the whales being brought on board through an opening in the ship's side and dealt with below, instead of being dragged up on to the weather deck and flensed there.

*It* ~~The~~ would be convenient in dealing with the detailed plans now submitted, if the Surveyors could forward an outline plan of general arrangements showing the proposal in general, and it is submitted they be informed by wire as follows:-

"Stockholm please obtain if possible and forward outline  
"plan of general arrangement showing proposed alterations  
"before dealing with the detailed plans"

*Recd. 22/12/28  
Amad. (Col. vlt). 27/12/28  
2 plans retained.*
