RANGOON,
AKYAB, BASSEIN, CHITTAGONG,
MAULMAIN.

Lower 1003 on down
Rangoon, 6th February 1900

At the request of Lyolls Surveyor
I have this day examined (under steam)
one of the Double Boilers of S. S. "Clam"
The Boiler and mountings as far
as I could see were in good order and
condition. The safety valve had a new
Check ring made to go under the nut,
and when tested the Boiler blew off at 94
lbs per sq in.

A. Mutter
Chief Engineer
