

IRON SHIPS.

2006

No. _____ Survey held at London Date 28th Aug to 12th Dec 1853
 on the Iron Bark Haddington Master D K Mason
 Tonnage Gross 1459 ⁵⁰/₁₀₀ Engine Room _____ Register 1459 ⁵⁰/₁₀₀ Built at Liverpool
 When Built 1846 By whom built The Vernon & Co Owners Penin & Co
 Port belonging to London Destined Voyage Bombay
 If Surveyed Afloat or in Dry Dock in Greens upper dry Dock & afloat

Length aloft	Extreme Breadth	Depth from Beam to top of Floor	Power of Engines	Horse No.	
217	33 ⁸ / ₁₀	22 ⁵ / ₁₀			
Distance between Floors amidships	1	"	Stem, if bar iron, moulding and thickness	9 x 3 ¹ / ₂	
for 120 ft	1	4	" if plate iron, breadth and thickness		
" " forward and aft	1	4	Stern-post, if bar iron, moulding and thickness	9 4 ¹ / ₂	
" " Ribbs amidships	1	4	" " if plate iron, breadth and thickness		
for 120 ft	1	4	Keel, if bar iron, depth and thickness	9 4 ¹ / ₂	
" " forward and aft	1	4	" if plate iron, breadth and thickness		
Floors, Size of Angle Iron, and No. 2 at bottom of Floor Plate	6	3 ⁹ / ₁₆	Garboard Plates, thickness	13 ¹ / ₁₆ full

" Number					
Transoms, material _____ or, if none, in what manner compensated for.	Circular Stern - formed with the frame angle Irons centered round.				
Knight-heads _____	are they free from defects?				
Hawse Timbers _____	are they free from defects?				
The Ribbs extend in _____	rivetted through plates with (3/4 in.) rivets, about (5 to 6 in.) apart.				
The reverse angle irons on the floors extend in _____	from _____ to _____				
" " " " on the ribs	from _____ to _____				
Keelson, if wood, length of scarp _____	if iron, how are the various lengths connected? by double Angle Irons at Top & bottom & double Butt strap between the Angle Irons				
Plates, Garboard, double or single rivetted to keel, with rivets (1 1/2 in.) diameter averaging (3 in.) from centre to centre of rivet.	edges from Garboards to turn of bilge, worked carvel with a lining piece () thick, or clencher, double or single rivetted; rivets (3/4 in.) diameter, averaging (3 in.) from centre to centre of rivets.				
" butts from Garboards to turn of bilge, worked carvel with a lining piece () thick, double or single rivetted; rivets (3/4 in.) diameter, averaging (2 in.) from centre to centre of rivets.	Do the lining pieces lap over and rivet through the lands of the strake below? yes				
" edges from bilge to wales, worked carvel with a lining piece () thick, or clencher, double or single rivetted; rivets (3/4 in.) diameter, averaging (3 in.) from centre to centre of rivets.	Do the lining pieces lap over and rivet through the lands of the strake below? yes				
" butts from bilge to wales, worked carvel with a lining piece () thick, double or single rivetted; rivets (3/4 in.) diameter, averaging (2 in.) from centre to centre of rivets.	Do the lining pieces lap over and rivet through the lands of the strake below? yes				
" edges of wales and to planksheers, worked carvel with a lining piece () thick, or clencher, double or single rivetted; rivets (3/4 in.) diameter averaging (3 in.) from centre to centre of rivets.	Do the lining pieces lap over and rivet through the lands of the strake below? yes				
Planksheer, how secured to the plating of the sides	Explain by sketch, if necessary.				
Waterway " " planksheer and to the Beams	how secured				
Side trussing: breadth and thickness of plates	how secured				
Deck trussing	how secured				
Deck Beams, how secured to the side	broad vertical flanges on beam ends rivetted to frame.				
Hold " " "	" " " " " " " " " " " "				
Paddle " " "	" " " " " " " " " " " "				
No. of breasthooks _____ crutches _____	how are pointers compensated?				
What description of iron is used for the angle iron and bar iron in the vessel?	_____				

927 Iron

Workmanship. Are the lands or laps of the clenchwork in all cases sufficiently wide to take the rivets and support the strain on them? *yes*
 Do the edges of the carvel work and of the butts lay close together throughout their length without requiring any making good of deficiencies? *where seen*
 Do the fillings between the ribs and plates fill in all solid with sliver pieces, or are they in short lengths? *solid*
 Do the holes for rivetting plate to lining piece, or plate to plate, &c., answer well to each other? *—* and are the rivet holes well and sufficiently countersunk in the outer plate? *yes where seen*
 Are there any rivets which either break into or have been put through the seams or butts of the plating? *no*
 Was the plating caulked internally in the wake of the frames or ribs? *appear so*

Her Masts, Yards, &c., are in _____ condition, and sufficient in size and length.

She has SAILS.			CABLES, &c.		ANCHORS, and their weights.		
N ^o .		Fathoms.		Inches.	N ^o .		
3	Fore Sails,	240	Chain	2	3	Bower,	<i>cut up lbs 49.2.23 462.14 44.0.19</i>
3	Fore Top Sails,	120	<i>60 additional to the 304</i> Hempen Stream Cable	1 7/16	1	Stream,	15.3.16
3	Fore Topmast Stay Sails,	120	Hawser	8 1/2	2	Kedge,	7.3.15 5.0.21
3	Main Sails,	120	Towlines	10			
3	Main Top Sails,	120	Warps <i>each</i>	6			
and all other requisite sail			All of <i>Good</i> quality.				

Her Standing and Running Rigging *are complete* sufficient in size and *Good* in quality.

She has *One* Long Boat and *3 other good Boats*

The present state of the Windlass is *Good* Capstan *2 3/4 inches good* and Rudder *Good* Pumps *5 in no^r Good*
fitted with purchase

GENERAL REMARKS.

Statement and date of repairs; extent of corrosion (if any) both internally and externally; and condition of rivets.

This vessel was originally built as a steam ship with Three decks — In 1/34 extensive alterations were effected, viz the engines removed, the Spar deck removed & sides cut down, the plating taken off down to Wale — Paddle & Main deck Beams & decks removed — Bulkheads removed except two — bow altered in form — also paddle space altered in form & side made to run fair with portions afore & aft — position of Main deck raised about two feet — nearly all new Beams & center block — plating renewed from Wale to Rail Ceiling renewed 100% — finally fitted up complete with Masts spars sails & as a sailing ship (new Anchors & Cables)

This vessel shortly after being built was filled in between floors in bottom (except in engine room space left unfilled) with Bricks & Mortar leaving a short space in center of each at Rail unfilled — This on the present occasion has all been taken out the engine beams or keelsons of Iron likewise removed — the Ceiling from the Lower deck down to keelson taken off — & the whole cleaned out & scale removed — also renewed the following in way of engine space — being badly worn & decayed 8 Garboard streak plates & 50 bottom plates — 1 7/8 to 1 1/16 inches thick 60 floor plates 120 Angle Iron floors (double) upwards of 60 ft Main keelson removed one Bilge keelson applied on each side of two 6 x 3 x 1/2 angle Iron back to Back run to Reverse Angle Irons on floors also about 18 Beams & Carls to Lower deck Lower Hold Ceiling all renewed — the Iron outside & inside previously coated with 2 Coats Red Lead — finally Main deck caulked — Is now in good condition & may be classed as recommended

In what manner are the surfaces preserved from oxidation? *Red Lead*

of opinion this Vessel should be classed *12 A 1*

The amount of the Fee£ 5 : - : - is received by me,

Special£ 8 : 8 : -

Certificate (if required)£ : 5 : -

Committee's Minute *18th December 1855*

Character assigned *A 1 for 12 Year*
Proof of Iron
