REPORT OF SURVEY FOR REPAIRS.

Mary Stenhouse

14339.

on referring to the original Report I find that the frames are spaced 186" apart - and the hold beams are fitted to carry 4th frame in place of every 2^d & every 4th frame alternately - The original Report does not state whether the butts of the bottom are single or double vented - and the plating of the topsides are only equal to 6th grade. I am of opinion that the sample of Clap A I would trust her Claimant better than any ten years' -
