IRON 437A-0095

3666 Iron

+ a half

**Workmanship.** Are the lands or laps of the clenchwork in all cases in breadth at least five times the diameter of edges and butts, and at least three times the diameter of the rivets where single rivetting is admitted? Yes

Do the edges of the carvel work and of the butts fay close together throughout their length without requiring any making good? Yes

Do the fillings between the ribs and plates fill in solid with single pieces, or are they in short lengths of various thicknesses? Yes

Do the holes for rivetting plate to frames, lining pieces, or plate to plate, &c., conform well to each other? Yes and

well and sufficiently countersunk in the outer plate? All through

Are there any rivets which either break into or have been put through the seams or butts of the plating? A few in butts

Her Masts, Yards, &c., are in Good W.P.M. condition, and sufficient in size and length.

She has SAILS.

CABLES, &c.

Fathoms.

Inches.

ANCHORS, and their weight

No.

*One pair of  
good Sails  
and*

Her Standing and Running Rigging Were New L. sufficient in size and Good in quality.

She has Two life long Boat and Two Cutters Prinace & Gie

The present state of the Windlass is Fair by Captain Two Winches and Rudder Good Pumps Two of Metal

**General Remarks, Statement and Date of Repairs, extent of corrosion (if any) both internally and externally, and condition**

- DATES of Surveys** held while building, as per Section 17.
- 1st. On the several parts of the frame, when in place, and before the plating was wrought Special Survey Nov 10th
  - 2nd. On the plating during the progress of rivetting Special Survey Nov 10th
  - 3rd. When the beams were in and fastened, and before the decks were laid First Survey 24th Feb
  - 4th. When the ship was complete, and before the plating was finally coated Part Survey 10th July
  - 5th. After the ship was launched Part Survey 10th July

The length being above 16 depts. Additional longitudinal strengthening.  
Sheerstrake doubled with plates  $26 \times 0\frac{1}{16}$  for three-fourths the length. On strake  
below do. doubled with plates  $33 \times 0\frac{1}{16}$  for two-thirds the length. Strake  
below upper deck sheerstrake doubled with  $0\frac{1}{16}$  plates for three-fourths the length.  
From deck fitted on tot. of upper deck beams for three-fourths of length, one plate  
running abt. the end on each side. An angle iron fitted on inner edge abt.  
hold beam stingers  $4 \times 4 \times 7\frac{1}{16}$  extending from 37 ft. before the fore engine room  
bulkhead to the after hatchway. Bulk plate between bilge keelsons  $7 \times 0\frac{1}{16}$   
from fore to after bulkhead. See Secretary's letter dated 20th Nov. 1863.

Is fitted with a Spar deck, frames all to the top height. Plating  $6\frac{1}{16}$  ths  
single riveted at edges, double at butts, lower edge of sheerstrake double with  
 $\frac{1}{4}$  rivets spaced 3 in. Beams Double angle irons  $6 \times 3 \times 7\frac{1}{16}$  &  $3 \times 3 \times 6\frac{1}{16}$ . Stingers on  
beams  $26 \times 0\frac{1}{16}$ , Angle Iron on do.  $4 \times 3 \times 7\frac{1}{16}$ . Iron deck riveted to beams for three-  
fourths the length one plate running out on each side & covered over a tot.  
width 3 in. Y. Pine. fastened with  $0\frac{1}{16}$  nut bolts from the top. Waterways  
 $6 \times 12$  R. Pine. fastened with bolts thru gunwale stingers. In view of side  
intercostal keelsons, horizontal plates fitted on tot. of floors  $15\frac{1}{2} \times 6\frac{1}{16}$  with double  
angle irons on tot.  $4\frac{1}{2} \times 13\frac{1}{2} \times 7\frac{1}{16}$ . In engine space two keelers from bulkhead to  
do. on each side, plates  $15 \times 6\frac{1}{16}$  double angle iron on bottom edge  $4 \times 4 \times 0\frac{1}{16}$ , top do.  $3 \times 3 \times$   
6. Intercostal keelsons see Secretary's letter dated 17th May 1864.

In what manner are the surfaces preserved from oxidation? Flat of hold cemented with Portland  
cement all other parts with paint

Pile. Spence. J.C.

I am of opinion this Vessel should be classed

The amount of the Fee ..... £ 5 : 0 : 0 is received by me,

July 22<sup>nd</sup> Special ..... £ 56 : 5 : 0

Certificate (if required) ..... £ : :

Committee's Minute 22<sup>nd</sup> July 1864

Character assigned

M.W.

J. P. Gleedstone *you can* *see* *the* *copy* *of* *the* *letter* *dated* *20/19*

This appears eligible for Class B as recommended by the  
Committee appointed to the Bridgeman and tonnage Committee  
This appears to be No. 3 in my recent Report of new ships seen at Liverpool. The Board  
question more nor less excited.
