First Survey No. _____ Port _____

Particulars of Repairs and Examination of Machinery. Reported to be damaged by the vessel taking the ground and straining on the 23^d March 1880. Crank shaft examined and found defective & unseaworthy. recommended new one to be fitted. Tail end shaft examined and found bent & unseaworthy. recommended new one to be fitted. One blade of the propeller broken. recommended it to be repaired, and new Ligum bitae fitted in Stern bush. Joint of condensers to bottom plate strained and leaking to be overhauled & repaired. Shafting to be relined throughout. The above repairs have now been satisfactorily completed.

General Observations, Opinion, and Recommendation:— The Machinery of this vessel is now in good order and safe working condition and eligible in my opinion to retain her class in the Society's Register books.

Survey Fee ... £ 4 4 -
