

Iron Ship "Tavernake" 1284<sup>1/2</sup> Tons  
Built at Stockton by Messrs  
Richardson & Duck -

We are of opinion this Vessel is  
eligible to be classed as recommended  
by the Local Surveyors ~~Regt.~~ <sup>Art.</sup> 1

With reference to the Cast iron  
used in the Cross heads of the Patent  
steering apparatus objected to by  
the Local Surveyors we were informed  
by the Patentee that it was Malleable  
Cast iron of which it was made  
and seeing <sup>the</sup> number of large ships  
in which the same arrangement  
has been used without failure  
we cannot object to it in this case  
Presuming that it has been with  
the Owners consent that it has  
been fitted
