LRDN502-0077

This section is submitted that we may dispense with the inner deck stringer plate to suit the particular trade for which the ship is intended, in lieu of which we substitute an extra stringer of double angle iron 5' 3 1/2" and the upper edge stringer is made 5' 3 1/2" instead of 4' 3 1/2". The angle iron on inner deck beams is 6' 4" instead of 4' 3 1/2".

The outside plating to be double riveted in lap joints. The main deck stringer plate is made 3' 8 1/2" instead of 2' 7" for 1/2 length.

In lieu of ties on inner beams we substitute a built up 10' 4" x 1/2" running fore & aft in centre of beams.

The inner deck beams can only have an angle iron on one side which is made 6' 3 1/2" instead of double 3' 3 1/2".

Please forward the section to your Committee and return as early as possible.

Sheer strake 1/16 for 1/4 length, thence to ends 10/16 and 9/16

Double Riveting

8' 1/16 for 1/2 length at ends 7/16

Single Riveting  
Double Riveting

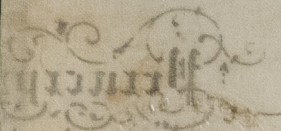

Proposed  
height of double  
frames

7588
