

"Astrologer"

Extract from L'pool Letter dated 15/7/71

Report N^o 22913 "Astrologer", New Iron Screw Steamer, referred to the Gen. Committee together with Copy of the Letter dated 18th Aug^t. I was instructed to address to the Builders of this Vessel Mess^{rs} Royden Sons, relative to the Angle Irons of the belged Intercoastal Keelsons and of the side Stringers in the Hold being riveted to the single reverse Frames only; Also Copy of their reply dated 13th Instant; And I have to observe that the previous similar instance alluded to in the Letter is ~~considered~~ concluded to be that of the "Glen Sannox" Report N^o 22242, Closed under the former Rules.

It is right that I should add that under the circumstances of the case the Owner of the "Astrologer" has not yet been communicated with from this Office, with reference to the Foot Note on the first Page of the Iron Rules, in respect to which the views of the General Committee are awaited.
