

Hamburg 9th Oct.
1871.

This is to certify, that in the
S.S. "Hamburg", owned by Mr. Robert M. Loman
in Hamburg and build at the Reihensied-
Schiffswerfte Hamburg under Number 228 in
the yard, The Boiler is tested with a
pressure of 130 lbs per square inch and
found in good condition. —

The Boiler is fitted with all necessary
safety apparatuses, as, safety valves,
water gauge etc. — The Engine is on
the compound principle and well made.
All necessary pumps connected with
the engine are well fitted and there is
also a donkey fixed to work out of
bilge or sea, to feed Boiler, to pump on
deck or outside. —

J. A. Liberty.
Inspecting Engineer
of the Hamburg Boiler Inspection Society.
