

Iron Coving Decked Screw Steamer  
"Albatross"  $7\frac{7}{8}$  Tons built at  
Stockton in 1872 and Classed  
90 A.1. 2 Decks and coving deck

Dimensions 225 x 28.1 x 17 ft to main deck  
24 ft to coving deck

In accordance with the requirements  
of Circular no 340 the Owners of this  
vessel submit a load line of 17 feet  
6 inches for the approval of the  
Committee.

It is respectfully submitted  
that this draught of water is greater  
than has been sanctioned by the  
Committee for vessels of similar size  
and construction, and that a fair  
and reasonable mean load line  
would be 17 feet - as shown on the  
tracing of Midship section - to be  
inserted in the Register book and  
on the certificate, and marked on the  
vessel's side in accordance with  
Circular no 354

25/10/76.
