

The undersigned by request of Messrs W. Pustan & Co attended this day on board the S.S. Altona for the purpose of holding final survey on said vessel but first referring to previous reports dated Hong Kong 20th & 25th March last -

We find all repairs therein recommended have been carried out in an efficient workmanlike manner. The Altona is now tight & staunch in the Hull & engines & Boilers in good & efficient working order spars, rigging & sails sufficient & in good order well found in ground tackling and all other seagoing material & we consider this vessel a good Risk for Insurance to carry dry & perishable cargoes
