Bordelaise

Dec 28/4/73

I feel unable to add very materially to my remarks on the Case of the Iron S.S. building by Mr. Lammie at Glasgow and as contained in my report of visit to the Clyde. - beyond that, it did appear to me that a great deal had come out of very little. - It is clear however, from Mr. Lammie's letter that the work done was necessary, and if not suggested by Mr. Besant he was quite right in not allowing the frames to pass in their fractured state.
