

2
S. S. "Howard."

It is respectfully submitted that a letter be written to the Barrow Shipbuilding Company, drawing their attention to Mr Joy's letter of 14th Aug. stating that some alterations were being made to the Experimental Boiler of S. S. "Howard"; which he expected would be completed in about a fortnight. Not hearing further from him, and it having come under the Committee's notice, that a similar boiler to that fitted in the "Howard" has recently returned from a voyage, and has not worked satisfactorily, the Committee would be pleased if they would favour them with the particulars of the case, and inform them what action is now being taken with the S. S. "Howard's" boiler.
