

S.S. Plover 602 ton register

The cocks and valves connecting the Engines and Boilers of this vessel with the sea cannot be seen without lifting the scotch hole plates, but considering they were arranged and partly fitted before Mr. Allison went to this district it is respectfully submitted that the vessel appears to be eligible to have the notification Lloyd's M.C. 1875 recorded in the Register Book and a certificate granted from the 20<sup>th</sup> of May 1875.
