

9

Iron Paddle Steamer "Paris" 483 Tons.
built at Glasgow by Messrs J. Elder & Co and
recommended to be classed A1 - "For Channel
purposes only" - maximum load line 8 feet.

This vessel has been completed in
accordance with the approved Plans appended.
She was not placed under special Survey
at the commencement of her construction (the
fitting being wrought and riveted at the
same arrangements were made for classifica-
tion in the Register Book); but she was
examined during the process of building, alongside
other vessels building under special Survey.
The Owners now desire the vessel to be classed
with the special Survey mark, and the case
recommended ^{by the local Surveyors Mr. Purdie} for the Committee's favorable
consideration.

It is respectfully submitted that
under the circumstances set forth, this
appears to be a case for the Committee's
favorable consideration with a view
to the vessel being classed with the
special Survey mark prefixed as recommended,
namely *A1 - "For Channel purposes only" -
one Deck. Load Line 8 feet.
