

Copenhagen 14<sup>th</sup> January  
1876

B. Weymouth Esq.  
Secretary  
London

Sir!

The spardecked Steamer "Dana", on which I in June 1874 gave you a preliminary Specification and draft of middle Section, is now finished from Messrs Hochmuss & Co's Building Yard in Malmo (Sweden) and have been under my special Survey from beginning to end.

The class 90 A-1. is desired in Lloyd's Book for this vessel, and as she is built of good Materials and well outfitted, I hope this Character will be granted by the Committee, and that a Certificate to that effect will be sent to me at your earliest convenience.

I inclose Specification and Draft of mid. Section for your further consideration and remain Sir

most respectfully  
Yours obly servant

H. J. Lodding  
Surveyor

P. S.

As the "Dana" is to load Cargo at Malmo for soon to leave that port, the Certificate's soonest arrival is looked forward to. — D. J.
