

S. S. Berrington of 507 tons.

This vessel has now been lengthened 30 feet in accordance with the Committees requirements. She was submitted to Special Survey No 3 in 1874, and marked SS-No 3-74 in the Register Book.

As "the whole of the vessel inside and outside has been thoroughly scraped and painted, the vessel lengthened, and the waterballast tanks tested under pressure as required, and the chains and anchors are new, the vessel appears eligible to be now marked in the Register Book SS No 3-76.
