DAVID BROWN & CO

147 Leadenhall Street,

London <sup>E.C.</sup> July 12 1877.

B. Weymouth Esq.  
Lloyd's Registry.

Dear Sir,

I propose adopting  
a  $4\frac{1}{2}$  inch homogeneous steel  
rope for the rigging of the  
"Cerberus" in preference to the  
ordinary Iron wire. I have  
had a piece of rigging tested,  
proof of which I enclose  
herewith, shewing a considerably  
greater strength than a 5 inch  
Iron rope.

I trust this will

be satisfactory to your Committee.

I remain Dear Sir,

Yours truly,

David Brown

To the Chief Surveyor  
Ry 12/11/77

"Cuba" Steel wire rope

I am respectfully sub-  
mitted that the results  
of tests accompanying  
this is very satisfactory  
and if the material  
size, and strength-for  
the strands be as set  
forth the same will  
merit the approval  
of the Committee.
