

New Iron Paddle Tug boat "Flying Scud"
74 Tons gross built at Heath under Special
Survey with a view to the 100 A Class,
Mr Ashton states that the workmanship is
not of a description to entitle the vessel to
this class, but that she is a very strong
boat, and recommends her to be Classed
A for Towing purposes.

It is submitted that from the First Entry
Report and Mr Ashton's letter the vessel appears
eligible to be Classed A for Towing purposes,
as now recommended.
