"Brighton" - No.  
(Iron)

Fairfield Works.  
Govan

Near

Glasgow - 14<sup>th</sup> March 1878

Dear Sir,

We have much pleasure in informing you  
that the speed trials of the steamer "Brighton", which you  
are aware has been built of steel, as was also her  
Boiler shells; was made yesterday, between Cloch and  
Aunbrae Lights on the Clyde, and the performance of the  
vessel was of the most satisfactory character: - the very  
high average speed of 16.8 knots being attained between  
these two points.

Your Chief Engineer Surveyor, Mr Parker, who  
was on board, will give you full details, and we have  
to thank your association for allowing him to be  
present to assist us.

We are,

Dear Sir,

Yours truly

John Elder & Co
