

Ella

15th July, 1849

With reference to recent
correspondence respecting the
steamer "Ella" it is my agreeable
duty to acquaint you that the
Committee of this Society
have had before them a report
from Mr. Molleson one of the
Society's Engineer Surveyors for
the Clyde, from which it appears
that the boiler of this vessel
has been strengthened and
made efficient and that,
subject boats being again
inspected by one of the
Society's Engineer Surveyors
within twelve months, they
have given instructions that
the character of the vessel in
the Register Book be reinstated
without the red ring over the
figure 1 in her classification.

as you will observe an
reference to my letter of the
9th ultimo, the sargines are
required to be opened for
inspection to complete the
special survey No: 2 prescribed
in the Society's Rules, which
inspection it is to be regretted
was not made by Mr. Morrison
on the occasion of his recent
survey, and I shall be glad
therefore if you will kindly
give me notice when it will
be convenient to you to have
the necessary survey completed.

I am,

Respectfully,
Your Obedient servant,

P.S. The certificate of classification
you did for the
will be handed
