

S.S. Mangerton, 1317 tons.

This vessel on her recent passage  
from Middlebro<sup>to New York</sup> encountered severe  
weather, and laboured and strained  
heavily, and was found leaky. Necessary  
repairs were done at New York, but the  
committee considered that the vessel  
should be further inspected on her  
arrival in this country.

The vessel is now lying in the  
Millwall Dock.
