

Dock Office Buildings,

West Hartlepool, 5th August 1880

Level

The Secretary
London

Sh

Sir
With reference to your letter
of the 3^d August respecting the ^{Ship} ~~Hawens~~
and warps supplied to the Hon. Sailing,
Mooltan Report No 4438 I regret the
Committee should consider those supplied
insufficient - I did not call any
special attention to the size on the
Report as they were similar in size to
outlet previously reported and in
accordance with the Owners Specification.
The vessel has sailed to Calcutta
I enclose letter received from the
Builders this day.

Industriele Transport.

"Noortzee", Hpe 44438

It is submitted that the equipment in this case is similar to what has been admitted in other cases previous to amendments in Table 22 for the Figure 1, but in order to prevent future misunderstanding, it is suggested that a Circular should be prepared and forwarded to the Surveyors intimating that in ships to be built in future, the formatters will require the equipment as set forth in amended Table 22, to be adhered to, unless their previous sanction has been obtained to a deviation from the same.
