

Extract from Mr Gyrell's letter dated Jersey, 1st July 1864

With regard to the "Gemini", I would first observe that the Stream Anchor is about 2^{nds} ^{lbs} 14 lighter than the Table specifies for a Vessel of 450 Tons and as the ship is ready, and a suitable Anchor is not to be obtained here. I have recommended that ^{the} one now on board should be exchanged as soon as possible for one of the lighter according to Table and which recommendation I should be glad to have endorsed by the Committee if thought desirable.
