

Received by Chief Ship Surveyor 23. 10. 00

Received from Chief Ship Surveyor

VESSEL'S NAME Steel S.S. "Isola di Favignana" Report Lgn No. 136

The remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/92.)

Nature of Survey 1st entry report.

It is submitted the Cardiff Surveyors be informed that the Leghorn Surveyor states that this vessel will arrive at Cardiff, and that the particulars of the test certificates for the chain cables and stream chain can be obtained by them from the certificates of test, which are stated to be now on board the vessel.

They should therefore be requested to obtain and forward full particulars of the said certificates to this office for the information of the Committee, with a view to the vessel's classification, as soon as she arrives at their port.

Mr. Cff 23/10/00

J.H.T.
23/10/00
C.H.P.

The Leghorn Surveyor should be informed that his omission to properly enter the particulars of the chain cable and stream chain as required, under the printed headings of the columns in the First Entry Report will now be the cause of delaying the classification of the vessel.

Mr. Lgn: 23/10/00
