

LIV 584-0350

Two Lee }
Ten Lee } The reports on these vessels are to be
returned to Spivee for explanation.

Mr Martin is requested to state what
particulars should be requested

J. M. S.

Oct 13/64

13/10/64

We are of opinion the height to which the American Rock
Plow is extended at the inner thickness, and at the outer thickness
of Planking should be distinctly shown on the midship section of
each Report, and the Committee should be informed whether or
not proper regard has been paid to the admission of American
Iron, in recommending these ships for the 14th grade. And as
the Reports state there is no Plank or Ceiling inside, we consider
the Committee should also be informed if they are intended to carry
Cargo, or Ballast in that exposed state
