

10

Barque "Junak" 513 Tons built at Trieste in 1869 and not classed.

This vessel now belongs to English Owners and has been surveyed at Liverpool with a view to being classed in the Register Book.

The second Continuation Survey Section 54, and Section 52, for vessels not built under survey, have been complied with, and the vessel has been classed by the Liverpool Committee 9 A - Continued for 6 yrs from July 1878, the question of the Figure 1 being referred to the General Committee.

The Chains and Anchors are of the proper size and weight, but they have not been tested as required by the Rules for British Ships.

Under these circumstances, as the vessel ^{now} is a British Registered Ship, it is respectfully submitted that she is not entitled by the Rules to the Figure 1, unless the chains and anchors are tested in accordance with the requirements at a Public Testing Machine.
