**Timbering.**—The Space between the Floor Timbers and Lower Foothooks is  $\frac{3}{5}$  Inches. The Space between the Top-Timbers is  $\frac{1}{5}$  Inches.

The Floors consist of English Oak

The First Foothooks of English Oak

The Second Foothooks of English Oak

The Third Foothooks and Top Timbers of English Oak

The Shifts of the First and Second Foothooks are not less than 6 ft. 6 in. N. B. When less than prescribed by the Rule, state how many.

The rest of the Shifts of the Frame are about 5 ft. 5 in.

The Frame is well squared from the First Foothook Heads upwards, and is free from sap, and from thence downwards, the frame is well squared.

The alternate Frames are bolted together to the Gunwale.

N. B. If not, state how bolted.

The Butts of the Timbers are close together; their thickness not less than  $\frac{1}{3}$  of the entire moulding at that place.

The Frame is chocked with a Butt at each end of the chock. The Main piece of Rudder is English Oak of Windlass is English Oak.

The Keel is Rock & Eng. Elm. The Main Keelson <sup>and Sides</sup> are of Green-head and are free from all defects.

The Stem, and Stern Post of English Oak. The upper part of stem Teak The Transoms, Knight Heads, Hawse Timbers,

and Aprons of English Oak and Teak Deadwood, of English Oak & Teak and are free from all defects.

The Deck and Hold Beams of Bulk iron The Breasthooks of Iron The Knees of Iron

**Planking Outside.**—From the Keel to the Height defined in Note to Table A or to the First Foothook Heads the Plank is Pitch pine, the Garboards of planks

From the above named Height to the Light Water Mark Pitch pine and a few years gone haws

From the Light Water Mark to the Wales Teak and a few years ago haws of English Oak

The Wales and Black-strokes are Teak The Topsides & Sheer-strokes Teak

Spirketting and Plank-shears Teak The Water-ways { Upper Deck Teak

The Water-ways { Lower Deck Teak and Green heads

The Decks of Antic fir State of very good

The Shifts of the Planking are not less than 16 Feet Inches. N. B. If less than prescribed by the Rule, state whether general

or partial, and if partial, in what part of the Ship. The Planking is wrought 3 between, and without step-butting

**Planking Inside.**—The Limber-strokes and Bilge-strokes are mostly Teak, a few planks of Green heart

The Ceiling, Lower Hold, and between Decks Teak Shelf Pieces and Clamps shelf of Green heart and Clamps

**Fastenings.**—To Hold Beams Shelf and Waterway, iron strong plates on ends of beams 2" x 10 1/2

and lapp plates at side of iron beams as shown in sketch appended

Beams at the Hold or lower deck beams, the stronger plates being 2" x 8 1/2

Fasthooks 10 of iron Pointers two pairs of iron Crutches 3 of iron

are of metal in the Bottom, and one Bolt in each Butt End through and clenched.

Strakes are bolted through and clenched. Treenails of Locust How Made turned

Table Floors is bolted through and clenched. General Quality of Workmanship good

I certify that the above is a correct description of the several particulars therein given

Mr. J. Green Surveyor's Signature

Lloyd's Register Foundation

Her Masts, Yards, &c. are in good condition, and sufficient in size and length.

23260 ton

She has SAILS.		CABLES, &c.		ANCHORS, and their weights.			
No.		Fathoms.	Inches.			No.	Weight.
2	Fore Sails,	Chain .....	300	2	Bower, .....	39-46	1 47-3" 14
2	Fore Top Sails,	Hempen Stream Cable .....	100	8	Stream, .....		1 45" 3" 24
1	Fore Topmast Stay Sails,	Hawser .....	100	7			1 43-0" 18
1	Main Sails,	Towlines .....	100	8			1 10m 1" 20
2	Main Top Sails,	Warp Stream Chain... and	75	178	Kedge, .....		1 5-1" 20
All of <u>good</u> quality. and test by Chain produced.							

Her Standing and Running Rigging of hemp and wire sufficient in size and good in quality.

She has one iron Long Boat and one life boat with 3 others

The present state of the Windlass is good Capstan good Rudder good Pumps of iron two of 8 in.

#### General Remarks and Statement and Date of Repairs, if any.

- DATES of Surveys held while building, as per Section 35.
- 1st. When the Frame is completed
  - 2nd. When the Beams are put in, &c.
  - 3rd. { When completed, and before the plank be painted or payed }

Jan 20<sup>th</sup> 1860 to June 28<sup>th</sup> 1860

This vessel has iron straps let into the frame extonally 5" x 3/4" extending from the long floor-beam to the upper deck beam - ends 13 pairs are fitted in the fore body, and 15 pairs in the after body, 4 pairs cross amidships, they are spaced 2-6 on a square in midships and 5 feet at the ends; 15 pairs of iron riders are also fitted in hold as shown in sketch of midships section, the same metal bolted, the upper and lower deck beams are of Bulb-iron 10" x 4" by 3/4" in thickness secured to the side by iron Ldg-plates metal bolted, also a stronger plate on beam-ends riveted to angle-iron on upper edge of beams on which the waterways are fastened and secured by bolts set up by nut and screw at the under part of plate in No 2, and in places 3 between each beam-end, additional screw bolts are also placed passing through the stronger plate and lower part of waterways. The waterways and shelves are bolted with metal in every timber, the beams are also tied fore & aft by iron plates at side of hatchways 5" 6" broad 8/16 and 11/16 thick, the deck secured by galvanized iron nut and screw bolts (Please see sketches appended) All material held fastenings are of yellow-metal, the Caulking of bottom tested and pieces cut for examination (See Rule) and found good after body is framed for a screw and planed over.

Present condition of Caulking of Bottom, good Deck, good and Waterways good

If Sheathed, Doubled, Felted, or Coppered yellow-metal on paper When last done now done

I am of opinion this Vessel should be Classed 13 A. I.
