 Pressure of Steam *25 lb.* ☒ Surveyed Afloat ☐ in Dry Dock
 Registered Horse Power *90* Classed *A 1*
 Last Survey No. *15308* Port *Dun* Years assigned. *9.79* Character in Register Book. *9.79*

Particulars of Repairs and Examination *at expiration of short machinery certificate*

Crank shaft examined. Flaw in after crank pin found to be extended to a dangerous extent. Recommended a new crank shaft to be fitted, which has been done. Examined Boilers & Superheater externally & internally. They were found fairly good, the patches fitted at last survey being perfectly sound & tight.

The Owners state their intention of fitting new Engines & Boilers to this vessel within the next four months

General Observations, Opinion, and Recommendation:— The Boilers of this vessel, and the machinery as far as seen are now in good order and safe working condition and eligible in my opinion to have the notification B.S. 12.80 recorded in the Register Book, subject to Boilers & Superheater being again examined at the expiration of four months from Date of Survey.
