REPAIRS, OR EXAMINATION AS PER RULE, FOR *Condition and Repairs*

This vessel is stated to have been damaged through grounding on Weymouth Reef, Sandy Island on 13th June 1888. The bottom outside has been cleaned and coated and is now in good condition. One plate on the port side and one plate on the starboard side, on the flat of the bottom nearly amidships have been removed. Two plates on the port side were removed, joined and refitted, several other plates were joined in place. Eighteen frames were more or less set-up and have been joined. All disturbed cement in the bottom has been renewed. Three of the steam winches have been repaired. The steel wire houses (3 1/2 inches) mentioned in Messrs Scrutton Son & Co's letter as having been put on board, has not been seen by the Society's Surveyors. Messrs Scrutton's letter attached herewith.
