Particulars of Examination and Repairs (if any) Annual Boiler survey
 (State clearly the cause of Repairs if any, and, in detail, the nature and extent of Examinations and subsequent Repairs.)
 Repairs due to other causes. State also the dates and initials of any letters and Limited List.

Did the Surveyor personally go inside each Boiler separately (including the Donkey Boiler, if any), and make a thorough examination at this time?
 If this was not done, state for what reasons?

And what parts of the Boilers could not be thus thoroughly examined?

Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each boiler?

Examined crankshaft and found it in a good condition. The aft half is said to be new

Examined the two main double ended boilers and two horizontal dome superheaters and found them good.

The donkey boiler was in use till the vessel left and the safety valves could not be set as the vessel left on Sunday.

It is the intention to complete the survey either in Antwerp where the vessel has sailed to or else on her return to this country.

General Observations, Opinion, and Recommendation:— As far as seen the
 (State clearly what alteration, if any, is suggested to be made in the existing classification and notification of the vessel's machinery in the Register Book, consequent upon this survey.)

machinery of this vessel is in a safe working condition and eligible in my opinion to remain as classed & to be removed from the limited list and to have the notification B.S. and date recorded on completion of the survey.
