in Donkey Boiler _____ (State name of Dock.) (as in Register Book.) 17C MC-7, 87

Last Survey No. _____ Port _____

Particulars of Examination and Repairs (if any)

(State clearly the cause of Repairs if any, and, in detail, the nature and extent of Examinations and subsequent Repairs.) Repairs on account of Damage should be separated from Repairs due to other causes. State also the dates and initials of any letters respecting this case.

Did the Surveyor personally go inside each Boiler separately (including the Donkey Boiler, if any), and make a thorough examination at this time? ☒

If this was not done, state for what reasons? ☒

And what parts of the Boilers could not be thus thoroughly examined? ☒

Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each boiler? ☒

Sea connections in good condition. Sail shaft drawn (to reline stern tube) examined & found good.

General Observations, Opinion, and Recommendation:—

(State clearly what alteration, if any, is suggested to be made in the existing classification and notification of the vessel's machinery in the Register Book, consequent upon this survey.)

now appears in a sound & efficient condition, rendering the vessel eligible in my opinion to remain as classed.
