 in Donkey Boiler 40 LM C. 6. 87
SS No 297

Last Survey No. " Port "

Particulars of Examination and Repairs (if any) Annual B.S. Repairs on account of Damage should be separated from

(State clearly the cause of Repairs of any, and, in detail, the nature and extent of Examinations and subsequent Repairs.)
 Repairs due to other causes. State also the dates and initials of any letters respecting this case

Did the Surveyor personally go inside each Boiler separately (including the Donkey Boiler, if any), and make a thorough examination at this time?

If this was not done, state for what reasons?
 And what parts of the Boilers could not be thus thoroughly examined?

Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each boiler?

examined also safety valves, sundry minor repairs done to main boiler
Pitting spotted on in Aberdeen Rep't No 3923
appeared to have subsided, & to be covered over by a thin scale & judged to be satisfactory

Listed main safety valves to 55 lbs per sq inch
Donkey " " " " 40 " " " "

General Observations, Opinion, and Recommendation: -- As far as run this
 (State clearly what alteration, if any, is suggested to be made in the existing classification and notification of the vessel's machinery to the Register Book, consequent upon this survey: thus for example, B.S. 1/89, B. & M. 1/89, or L.M.C. 1/89, as the case may be.)
results machinery is in order & she is eligible in my
opinion to remain classed & to have the notation
B.S. 6.89 recorded in the Register Book (without the
limit)
