 (As in Register Book, including date of last Boiler Survey) 86.7.89 + L.M.C. 3.88

Last Survey No. 1889 Port London

Particulars of Examination and Repairs (if any) Seacocks

(State clearly the cause of Repairs if any, and, in detail, the nature and extent of Examinations and subsequent Repairs.) Repairs on account of Damage should be separated from Repairs due to other causes. State also the dates and initials of any letters respecting this case

Did the Surveyor personally go inside each Boiler separately (including the Donkey Boiler, if any), and make a thorough examination at this time?

If this was not done, state for what reasons?

And what parts of the Boilers could not be thus thoroughly examined?

Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of these parts of each boiler?

Examined Seacocks & connections and found them good.

General Observations, Opinion, and Recommendation:-- As far as seen the  
 (State clearly what alteration, if any, is suggested to be made in the existing classification and notification of the vessel's machinery in the Register Book, consequent upon this survey: thus for example, B.S. 1/89, B. & M. 1/89, or L.M.C. 1/89, as the case may be.)

Machinery of this vessel is in a safe working condition and eligible in my opinion to remain as classed.
