1st Survey, No. 48787 Port Lon

Periodic Surveys, when held, must be reported in detail and separately in the terms of the Rules. State clearly the cost of Repairs, if any, and, in detail, the nature and extent of Examinations and subsequent Repairs. Repairs amount of Damage (the cause of which must be stated) should be separated from Repairs due to other causes; it besides being detailed in the body of the report, should be summarized in the form shown below. Whenever the movement of Anchors or Chains is reported, the particulars of weight or size and test of the articles should be fully stated, and also the weight or size, &c., required by the Rules, together with the vessel's Equipment Letter, if any. State also the dates and initials of any letters respecting this case.

PAIRS OR EXAMINATION AS PER RULE, FOR Condition.

This vessel has been placed in dry dock. The bottom examined and is in good condition.

General Observations, Opinion as to Class, Recommendation, &c.:

State clearly whether any end, if so, what alteration is suggested to be made in the existing classification and notification of the vessel in the Register Book consequent upon this survey, thus, for example—“to remain as now classed in the Register Book without fresh record of Survey,” “to remain as classed and to have record of survey, 9.91,” or “to remain as classed and to have record of survey, 9.91, and the notation of ss No. 1-91 and ptND91, &c.”

This vessel is in good and efficient condition, eligible in my opinion to remain as classed and to have record of survey 9.92.
