Now done to complete Boiler Survey: Main & Donkey Boilers tried under steam and Safety Valves adjusted as above.

General Observations, Opinion, and Recommendation:—
(State clearly what alteration, if any, is suggested to be made in the existing classification of the vessel's machinery in the Register Book, consequent upon this survey, and also any alteration required to be made in the records of the vessel's machinery, boilers, working pressures, &c.: thus, for example, B.S. 9,95, B.&M.S. 9,95 or L. M.C. 9,95, 140 lb., F.D., &c.)
The machinery of this vessel is in good condition and in my opinion eligible to remain as classed and this Survey being now completed to have fresh record assigned of B.S. 5-96. and vessel's name removed from Special Limitation list
