

Report of Survey for Repairs, &c., of Engines and Boilers.

(Received at London Office)

Date of writing Report *24 Nov 1896* When handed in at Local Office *24 Nov 1896* Port of *London*
 No. in Reg. Book *9* Survey held at *London* Date, First Survey *23 Nov 1896* Last Survey *24 Nov 1896*
 on the Machinery of the *Wood, Iron or Steel* *H. Imagoel Castle* Master
 Tonnage Gross *5400* Net *4000* Vessel built at *Glasgow* By whom *Fairfield & Co Ltd* When *1896*
 Registered Horse Power *140* Engines made at *Donkey* When *'96* Boilers, when made (Main) *'96* (Donkey)
 No. of Main Boilers *2* Owners *D. Laurie & Co* Port *London* Voyage *Local*
 No. of Donkey Boilers *2* If Surveyed Afloat or in Dry Dock *In Green's Dry Dock* Particulars of Classification (which must be inserted precisely as in Register Book & Supplements).
 Steam Pressure in Main Boilers *140 lb.* in Donkey Boilers *140 lb.*

Last Survey No. *1896* Port *London*

Particulars of Examination and Repairs (if any) *In Dry Dock. Cleared at Green's Dry Dock.*

Periodical Surveys, when held, must be reported in detail and serially in the terms of the Rules. State clearly the cause of Repairs, if any, and, in detail, the nature and extent of Examinations and subsequent Repairs. Repairs on account of Damage (the cause of which must be stated) should be separated from Repairs due to other causes; and besides being detailed in the body of the report, should be briefly summarised at the end of the report. State also the dates and initials of any letters respecting this case.

Did the Surveyor personally go inside each Main Boiler separately and make a thorough examination at this time?

Do. " Donkey " "

If this was not done, state for what reasons?

And what parts of the Boilers could not be thus thoroughly examined?

Also what special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each Boiler?

Did the Surveyor examine the Safety Valves of the Main Boiler?

At what pressure were they afterwards adjusted under steam?

Did the Surveyor examine the Safety Valves of Donkey Boiler?

To what pressure were they afterwards adjusted?

Has the propeller shaft been drawn and examined at this time? *No.*

If the Survey is not complete state what arrangements have been made for its completion? *Complete*

Propeller Stern-bush and outside footings of Sea Connections examined and found in good order.

General Observations, Opinion, and Recommendation:—

(State clearly what alteration, if any, is suggested to be made in the existing classification of the vessel's machinery in the Register Book, consequent upon this survey, and also any alteration required to be made in the records of the vessel's machinery, boilers, working pressures, &c.; thus, for example, B.S. 9,95, B.&M.S. 9,95 or L.M.C. 9,95, 140 lb., &c.)

The Machinery of this vessel is in good condition and in my opinion eligible to be notified in the Register Book as contemplated.
