

14th January 1882.

Sir,

With reference to recent correspondence concerning your steamer "George Howland," I am directed to acquaint you that the Committee of this Society have had the case of this vessel again under consideration and that they have resolved to give directions for the putting of a red ring over the figure 1 of this vessel's character in the Society's Register Book, as shown on the enclosed sample page, indicating that the present condition of the vessel's stern hatch is such as to imperil her safety. I am, Sir, your obedient servant,
Wm. J. Harrison
