Lloyd's Register of British Foreign Shipping
Port of Dunedin

20th December 1890

This is to Certify that I William Thomson the undersigned surveyor to this Society did at the request of Capt N. Boyd local manager of The New Zealand Shipping Company, make a careful inspection of the chain cables on board of the ship "Ottoquina" ^{Veritas} 1250 tons, and found the exact size of links to be $1\frac{1}{16}$ inch to 2 inches and 120 fathoms in length, and in my opinion is suitable for the ship "Rangitiki" 1188 tons and will fully comply with Lloyd's Rules respecting ground tackle for the last named vessel.

(s) Wm Thomson
