

Lake P. Cay
Lake P. Cay

Dear Sir,

10th October 1894

Your memo.

I am sorry to hear that you are
unwell, and hope you will be
able to return to your work soon.

Yours faithfully,
John G. Cooper

The Secretary

The main butt stops of the shell
plating to 2" thick; the main stops
in the diam of one foot each an
aperture area of 20 square inches, & the
two corners in all to be filled with
wooden members 12" x 4"; additional stops
to be fitted and arranged as a
in all; the longitudinal stop above
the main members to 12" square
diameter; doubling plates 1/2" thick
to be fitted on the front tube plate
between the sections, tubes, & also
on the back end plate opposite the
main members; the pitch of the
crossed stops to not more than 1/4 inch
in construction chamber in; the cross
stops marked O in red at the circumference

of the construction of the tanks
have not been effected, and of 12 ft
inches, except the top corner piece
marked on and, which must have
an effective area of 12 square inches.
The 8 bars on the water gunnace
bottoms be retained as indicated in
no. 8 bars be also fitted on the
wing gunnaces as amended, the steel
also be tested as prescribed by the
Rules, & the boiler to built under
the usual conditions of survey and
testing & to the satisfaction
of the Society's local Surveyors.
I enclose the plan here
with, & shall be glad to receive it again
when noted, in order that it may be
forwarded to the Surveyor for his signature
during construction.

I also enclose a formal
request form for survey, which directly
fill up, and return to me at your
convenience.

I am,

Dear Sir,
Yours faithfully,

Wm. J. Fraser & Son,
Millwall Dock Works,

London
