LON728-0081

Referred to the Chief
Engineer Surveyor.

afv

17 DEC. 1895

The scantlings of this boiler must meet the requirements of the Rules for the proposed pressure of 80 lbs per sq inch. It is submitted that provided the boiler be found on survey to be in good condition and that it be satisfactorily shown that the steel plates have been tested as req^d. by the Rules the boiler should be app^d of. Certificates of hydraulic test should also be produced or the boiler be retested.
