E.

13th., November, 1896.

Dear Sir,

I am in receipt of your letter of the 12th. inst., submitting an amended plan of the boiler to be built by you for the steam trawler "EMERALD", and with regard thereto have to acquaint you that provided the boiler be constructed in accordance with the scantlings shown on this plan, and the usual conditions of survey and testing be complied with, the same will be approved by the Committee for the intended working pressure of 120 lbs per square inch.

The plan in question has been handed to the Surveyor for his guidance during construction, and I shall be glad if you will kindly advise me of the delivery of the plates at your Works, in order that the Surveyor may examine the same before work is commenced on them.

I am, Dear Sir,

Yours faithfully,

Secretary.

A. Dodman Esq.,

Highgate Works,

KING'S LYNN.
